EVOLUTION i-G5

LAURASTAR[®]
You deserve the best.

LAURASTAR expertise **at your service**

The Swiss company LAURASTAR invented the system of professional ironing for private use in 1986. Since then, almost 2 million users in over 40 countries worldwide have enjoyed quality ironing on a daily basis.

Two decades later, LAURASTAR has become the benchmark for innovative, high-quality ironing systems. LAURASTAR views this position of world leader as a responsibility which you, the consumer of our appliances, confer on us.

Every day, the LAURASTAR engineers, designers and employees work towards improving products and services so that we live up to our promise of making life easier for you in your everyday tasks, thus leaving you more time to spend with your family and friends or for your leisure pursuits.

This is achieved through our research laboratories specialising in ironing and our capable customer service experts who can offer extensive, personalised advice. Lastly, we develop products for the LAURASTAR label that meet your actual needs and come equipped with international technological innovations, backed by the Swiss-made quality guarantee.

Flick through the pages to explore the EVOLUTION i-G5 steam generator featuring the new, exclusive CLiICK™ technology, a major innovation in the ii™ – INTELLIGENT INNOVATIONS programme, patented by LAURASTAR, which can halve your ironing time and is extremely comfortable to use.

Sincerely,

Your LAURASTAR team

EVOLUTION i-G5

automatic steam

for more simplicity

AQUA FILTER

Scale filter – ordinary water can be used and the iron's service life is extended.

WATER DETECTION

NEW – Automatic water level detection system, to fill the reservoir continuously without switching off the iron.

PERMANENT IRONING

Removable 1-litre reservoir – uninterrupted ironing without waiting.

FAST HEATING TIME

Super fast heating time in three minutes for immediate use.

CLiick™ - INTUITIVE AUTOMATIC STEAM

NEW – Intelligent, intuitive function of the automatic steam for effortless ironing twice as fast.

CONSTANT PRESSURE

A constant pressure of 3.5 bars produces 200 litres of steam volume per minute – the result is professional ironing quality.

DOUBLE VOLUME

Double volume of extra fine steam, for a lasting result leaving no damp traces.

life is more beautiful with the EVOLUTION i-G5

No more need to push a button, it manages the steam all by itself.

The SOFTPRESSING soleplate means being able to iron even your most delicate fabrics.

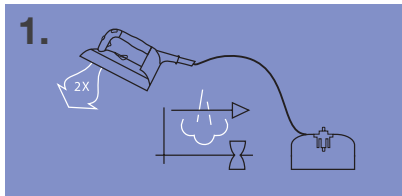

Thanks to its integrated AQUA G-LINE filter, you only need to use tap water.

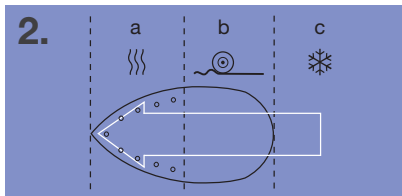

It guarantees you a perfect look.

the unrivaled **advantages** of LAURASTAR

LAURASTAR professional steam – patented

The steam is diffused at a constant pressure which produces 200 litres of steam per minute, as recommended by ironing professionals. Heated once in the boiler, the steam is cooled and then reheated inside the iron: this is the unique LAURASTAR double-volume steam.

LAURASTAR professional soleplate – patented

The LAURASTAR professional soleplate is designed for the following three steps in ironing: (a) heating, (b) smoothing and (c) cooling the fabric. The fibres are thus fixed in a single movement for a lasting result.

the new patented technology
CLiICK™ – **intuitive automatic steam**

To make your life even easier, LAURASTAR has developed the ii™ – INTELLIGENT INNOVATIONS programme just for you.

A major innovation in this programme is the CLiICK™ patented technology. A slight movement of the wrist produces the steam automatically as the iron is pushed forwards and stops it immediately when the iron is halted or moved backwards: no more need to press a button to activate the steam!

A few minutes is all you need to get to know the iron and this technology and you can then appreciate all its unique advantages:

1. Time saving

The automatic steam reduces ironing times by half.

2. Comfortable use

A good quantity of extra fine double volume steam is generated automatically – you no longer have to think when to activate the steam control.

3. Less effort

Instead of constantly activating the steam control, the thumb rests on the iron's ergonomic handle, just like a natural extension of your hand.

4. Ironing precision

The quantity and quality of the automatically produced steam is ideal for very precise ironing.

5. Energy saving

Just the right amount of steam requires less steam production and therefore less energy consumption.

6. Tested and recommended

The new CLiiCK™ technology has been tested for several months in our laboratories to ensure its reliability. Ironing professionals have also tested it and all recommend it without hesitation.

EVOLUTION i-G5

Iron	automatic steam
Steam pressure	3.5 bars (double volume)
Steam droplets	extra fine
Ironing time	unlimited
Heating time	approx. 3 minutes
Water tank capacity	removable, 1 litre
Iron rest position	tilted
Electric cable	approx. 3 m
Dimensions (L x W x H)	24 x 41 x 28 cm
Power appliance	2200 W
Total weight	approx. 7 kg
Storage of iron	iron holder

Accessories included	SOFTPRESSING soleplate
	AQUA G-LINE integrated filter
	+ 1 AQUA REFILL refill
	HOLDER G-LINE cable holder
